

Storr Mountain Net

SW115661

Flexible T-Connector

4m Climbing Net with Social Base Layers

Hot Dip Galvanised Mast

Spatial Net designed to EN1176

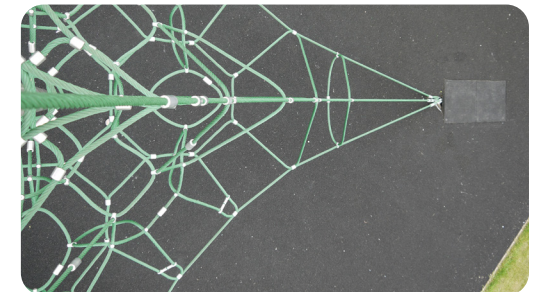

Description:

The Storr Mountain Net is a dynamic rope climbing structure designed to spark adventure and active play. With a central steel mast and secure ground anchor points, its internal rope layers form platforms that support climbing, resting, and socialising.

The open design ensures clear visibility for easy supervision, while the durable construction makes it a long-lasting feature in any outdoor space.

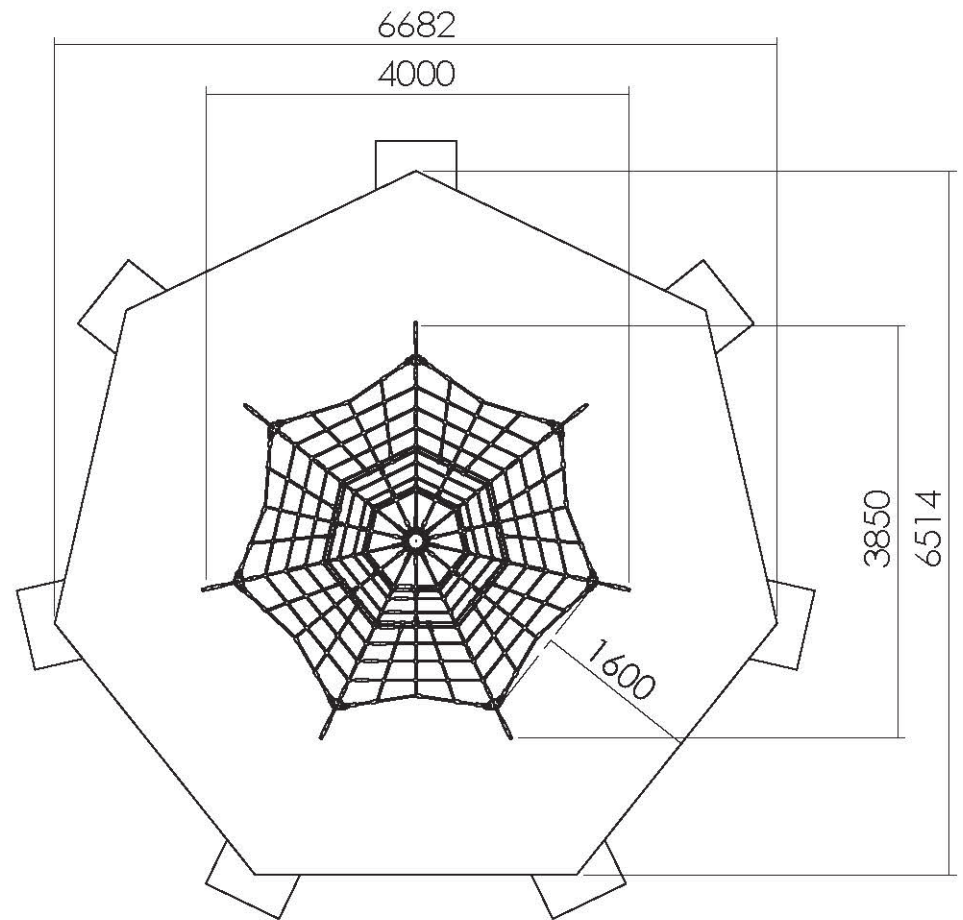

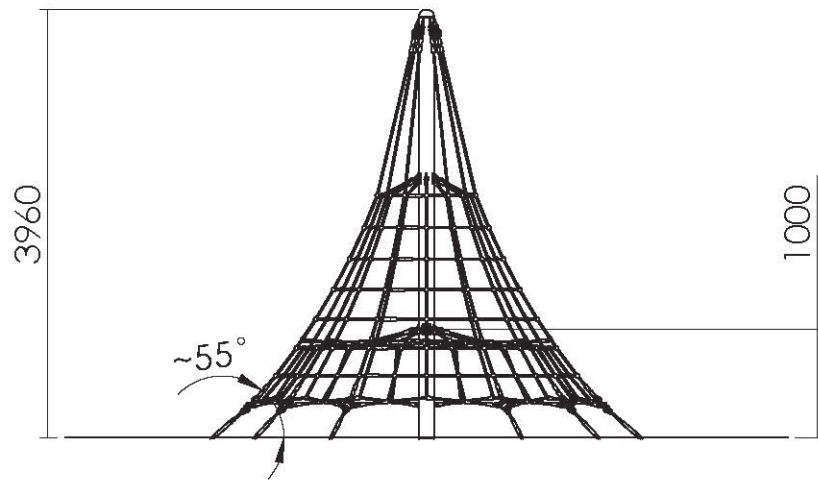

16mm Glue Braided Nylon Rope

Corner Box for wet pour & Grass Mat surfacing
