

A collage of 15 circular images showing various children playing on different types of rope play equipment. The images are arranged in a circular pattern around a central blue triangle containing the text "PRODUCT GUIDE". The equipment includes climbing frames, nets, and structures with slides. The children are of various ages and are actively engaged in play. The background of the collage is a mix of blue and white geometric shapes.

[illegible]

# CRAFTING ADVENTURE SINCE 1993

As part of the global PlayPower family, Tayplay is proud to be the UK's leading specialist in rope-based play and custom rope net solutions.

From our home in Perth, Scotland, we've been designing and manufacturing innovative play structures for over 30 years. Our products – from dynamic rope nets to fully customised climbing frames and bridges – have become a core part of playgrounds across the world, trusted by communities, landscape architects, and global brands alike.

## OUR PHILOSOPHY

At Tayplay, we believe that every playground has a story—and every customer deserves a solution that fits their unique vision.

Whether you're seeking a bold custom structure or a ready-to-go product from our trusted standard range, we approach every project with the same level of care, creativity, and technical expertise. Our dedicated team works closely with playground companies, designers, and planners to bring ideas to life—on time, on spec, and always to the highest standards.

From small community spaces to large-scale installations, our goal is simple: to create safe, inspiring, and joyful play experiences that leave a lasting impact.

## QUALITY & SAFETY

Innovation and precision are at the core of our design and manufacturing process. Every rope net we produce is carefully engineered and rigorously tested to meet—or exceed—international safety standards including EN, ASTM, and CSA.

Our experienced in-house team oversees every step, ensuring consistent quality, long-term durability, and above all, child-safe play. With Tayplay, you can trust that every detail has been considered.

## A LEGACY OF PLAY

For over three decades, Tayplay has stood at the forefront of rope-based play. What started in 1993 as a small team with a big idea has grown into a globally respected brand.

Today, our products are found in parks, schools, and public spaces across continents—woven into the everyday adventures of children everywhere. We're proud of where we've come from—and even more excited about where we're going.

## WHY ROPE PLAY MATTERS

Rope play is more than just fun—it's a vital part of childhood development. As children climb, balance, and swing, they're not only building physical strength and coordination, but also learning how to take risks, solve problems, and trust their instincts in a safe and supportive environment.

This kind of open-ended, imaginative play sparks creativity, boosts confidence, and nurtures resilience—skills that reach far beyond the playground.

## SERVICE & MATERIALS

Behind every Tayplay product is a team that genuinely cares.

We're here to make your project smooth, successful, and stress-free—from the first conversation to the final installation. Whether you're choosing rope colours, fittings, or need technical guidance, we offer the speed, flexibility, and personal support that bring your ideas to life.

Our commitment to you doesn't end when the product ships. We're your partner for the long run, delivering on quality, service, and peace of mind—every time.

## Playground Standards

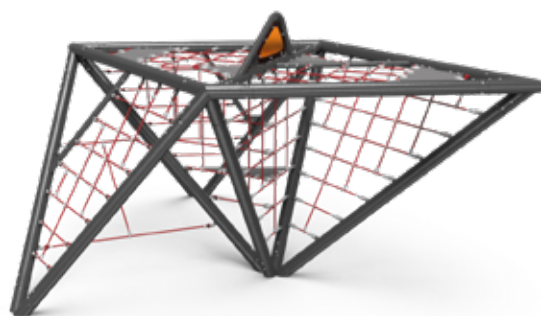

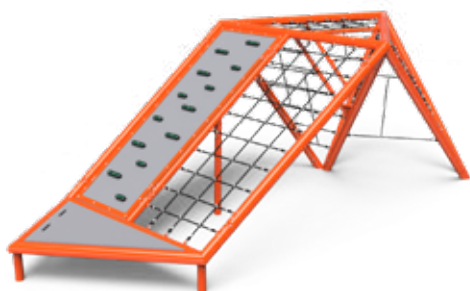

Our certified structures are certified to EN1176 outdoor play. All custom nets can be designed to EN1176, EN15567 rope adventure course, ASTM or CSA standards.

## NAICA™

Featuring a series of daring triangular nets and integrated classic elements, Naica™ invites children to explore, climb, and connect in new and exciting ways. Its asymmetrical layout offers multiple climbing paths—providing a variety of challenges that grow with each child's confidence and ability.

### Naica 4.0

# TIANZI™

The Tianzi™ Range presents a captivating collection of climbing structures, designed to inspire children to explore, climb, and engage with dynamic rope nets and exciting play elements. From simple standalone units to more complex, interconnected triangular nets, each piece encourages balance, coordination, and adventure in unique ways.

## MOUNTAIN NETS

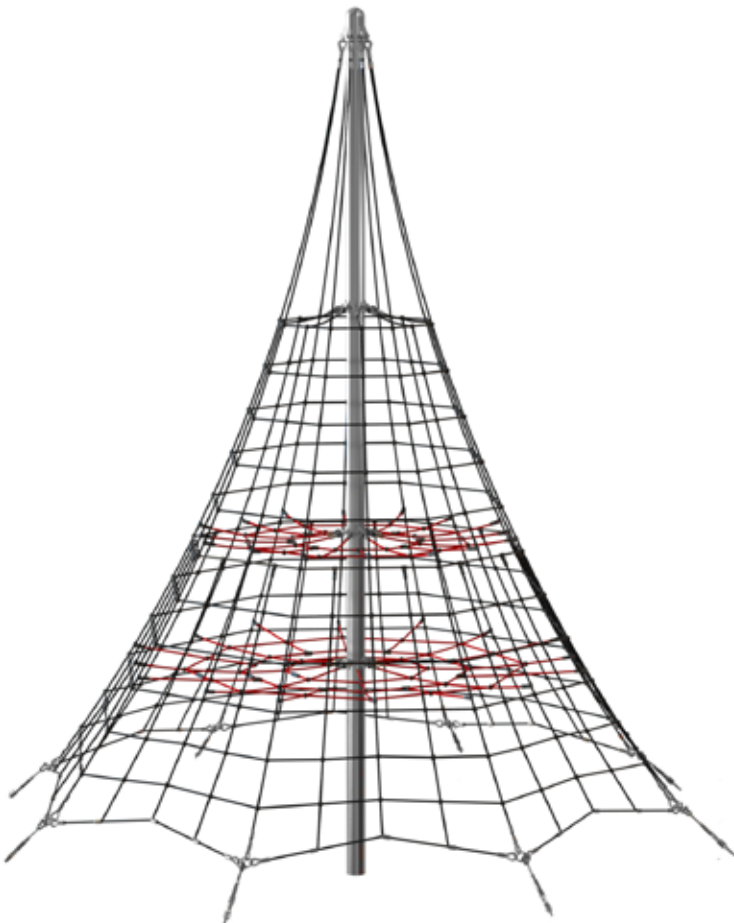

Mountain Nets are bold, space-smart rope climbing structures designed to inspire movement, imagination and confidence - with a smart, efficient footprint. Featuring a central steel mast, secure anchor points, and internal rope layers for climbing and rest, their compact, steep-sided design delivers maximum play value with a minimal surfacing footprint.

## CRAFTING THE NET

For over three decades, Tayplay has stood at the forefront of rope-based play. What started in 1993 as a small team with a big idea has grown into a globally respected brand.

Today, our products are found in parks, schools, and public spaces across continents — woven into the everyday adventures of children everywhere. We're proud of where we've come from—and even more excited about where we're going.

# TAYPLAY AROUND THE WORLD

We've had the privilege of working with incredible customers across the globe, bringing our high-quality rope play solutions to a wide range of projects.

From bespoke designs to large-scale installations, our work is featured in playgrounds, parks, and public spaces worldwide.

Scan to view more

## THE HIVE

Designed by Helen Foot, "The Hive" is an impressive indoor playscape brought to life through the collaboration of UD York, Steel Line, and Tayplay. Together, the team created a dynamic, safe, and durable play environment.

Tayplay played a key role in the project, contributing innovative rope elements crafted with high-quality materials. They ensured safety and quality throughout the process and collaborated seamlessly with the other teams to deliver a flawless installation.

Now a beloved destination, The Hive offers children an exciting and engaging play experience.

## KENNEDY SPACE CENTER

Tayplay, Softplay, and the Playpower Group joined forces to create a stellar playscape at the Kennedy Space Center in Cape Canaveral, Florida – the home of NASA!

Tayplay's specialist team designed and crafted unique rope elements, including black hole tunnels, galactic netting, and vortex structures, inspiring the next generation of astronauts and engineers through play.

This extraordinary project combines imagination, innovation, and adventure, offering a truly out-of-this-world experience for visitors of all ages.

## FORUM SINTRA MALL

Tayplay collaborated with Play Planet to design and manufacture custom scramble nets for Forum Sintra in Portugal.

The installation features four group hammock nets, offering shoppers a unique space to stop, play, and relax. Additional safety netting ensures a secure environment by preventing smaller items from falling to the floor below.

Whether resting after a day of shopping or enjoying a quick scramble, these nets provide a playful and practical escape in the heart of the shopping centre.

## HAAPSALU PRIMARY SCHOOL

Tayplay designed and manufactured a large custom rope net and tunnel for MUUW, leading a project for Haapsalu Primary School in Estonia.

Using SolidWorks, the net was modelled and produced at Tayplay's factory in Scotland. Tayplay's technical team provided guidance on EN playground safety standards and assisted MUUW in preparing the framework for installation.

The upper-level net offers a space to scramble and relax, while the rope tunnel provides a fun shortcut through the treehouse—making the journey to the next lesson an adventure!

## HONG KONG AIRPORT

Located by Gate 11, the Wonder Eggshell play area, designed and installed by Sinocham Play, offers young travellers an exciting pre-flight adventure. This distinctive space features an enormous eggshell structure with intricately designed Tayplay rope nets, serving as a striking focal point.

The structure seamlessly connects to climbing nets, slides, and a gracefully curved net tunnel adorned with vibrant ribbons hanging from the skylight, creating a dynamic and engaging play experience.

# ROPE

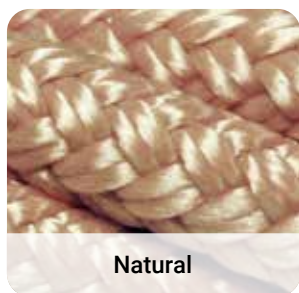

## STEEL-REINFORCED ROPE

Our braided nylon and MFP ropes are built for high performance in demanding environments. Each rope features six galvanised steel strands and a fibre or steel core, delivering excellent strength and durability with a tensile rating of 1,570 N/mm<sup>2</sup>. The outer yarns are UV-stabilised for lasting colour and weather-resistance.

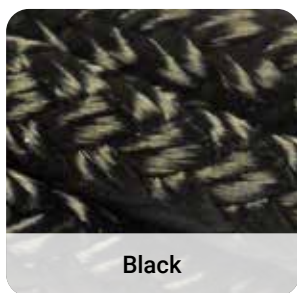

**Available in:**

**Braided Nylon/MFP** - 16mm; 18mm; 20mm; 22mm; 23mm; 24mm

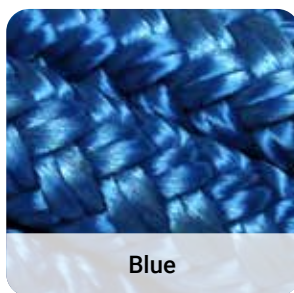

Our **Fendex ropes** (120mm; 140mm) are also steel-reinforced.

# CONNECTORS & END FIXINGS

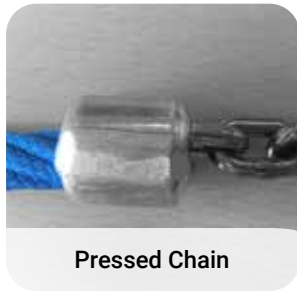

## CONNECTORS AND END FIXINGS

Our precision-engineered fixings don't just hold things together — they're the hidden heroes of every rope structure we build. Crafted for strength, stability, and long-term durability, they meet EN1176 standards for finger and chain entrapments, so kids stay safe while the adventure keeps going.
